

“**The biggest cause for unproductivity in leaders is not talked about, in fact it doesn’t even have a name - until now.**”

## **Every Leader Stumbles. The Best Learn How to Recover!**

Ritu G. Mehrish is a woman on a mission to humanise leadership. She provides a refreshing and unique perspective on leadership by talking about the challenges, dilemmas and blocks that leaders go through in their leadership journey.

Her topic ‘Leader’s Block’ (yes, like writer’s block!) is very relevant to the leaders today to prepare them for the future. As per her research and interviews with hundreds of leaders across the globe, she found that Leader’s Block is one of the top reasons for unproductivity and blip in leadership. But interestingly it’s not talked about - in fact it didn’t even have a name until now.

By talking about Leader’s Block, she enables leaders to recognize, acknowledge, overcome it and build leadership-staying power.

She speaks about its triggers, impact, symptoms and ways to overcome it.

Ritu tells stories of other leaders, who have gone through the challenges and blocks that you are facing, to inspire you and help you find a little bit of yourself in them.

Ritu is a global speaker, executive coach and author, with twenty years of corporate experience with P&G, GE Capital and GE spin-off Genpact. In her previous role, Ritu ran a multimillion-dollar business vertical with over 1000 people across eight countries and five continents. Her business and leadership experiences have enabled her to bring in a pragmatic approach to leadership development.

Leader's Block exists! But Imagine how much more productive an organisation would be if it knew how to identify and deal with it.

The cost of Leader's Block (millions of dollars) is too huge to be ignored. The productivity gains waiting to be unlocked too large not to be taken advantage of.

Book Ritu Mehrish to inspire your employees to be future ready and build leadership staying-power.

She engages her audience with the perfect blend of head and heart.
